

HOLE ONE

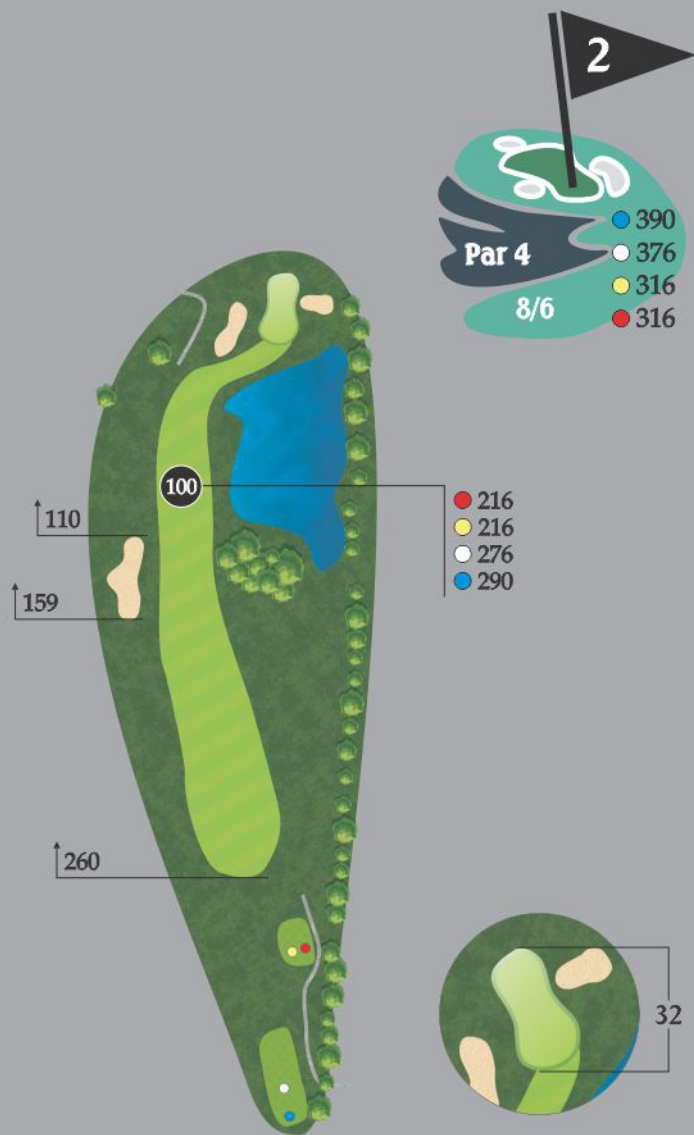

Good starting hole. It is an easy par four with lots of room for your drive. The green slopes a little back to front.

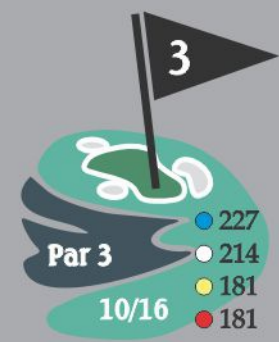

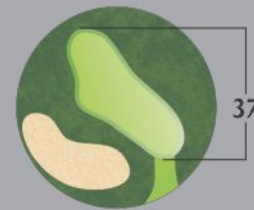

HOLE TWO

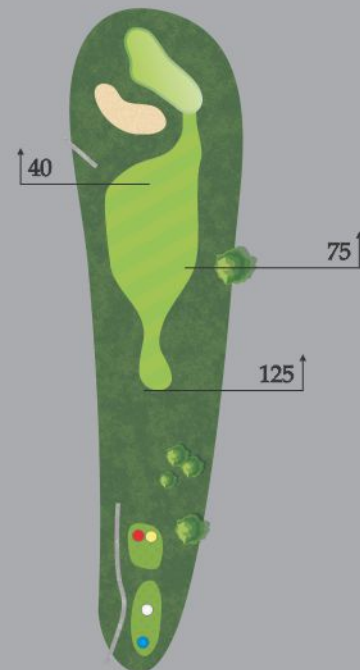

A drive down the left side of the fairway will give you a better approach shot into the green on this par four. A pond comes into play on your second shot. The green is two tiered, front to back, you will want to check where the flag is before you hit your second shot.

HOLE THREE

A long par three with a large bunker in front of the green. Make sure you use an extra club, better to be long than short.

HOLE FOUR

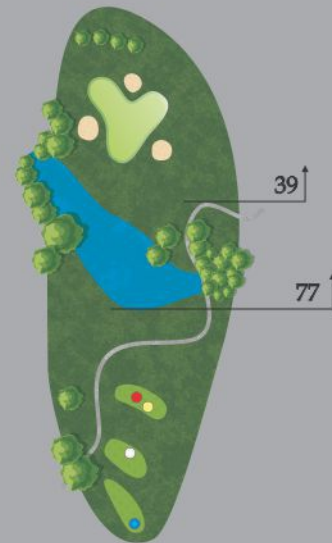

A short par five. Here is your chance to tee it up and rip it. A solid drive in the middle of fairway will set up nice opportunity to go for the green in two. Green slopes back to front, it is easy to hold on your second shot.

HOLE FIVE

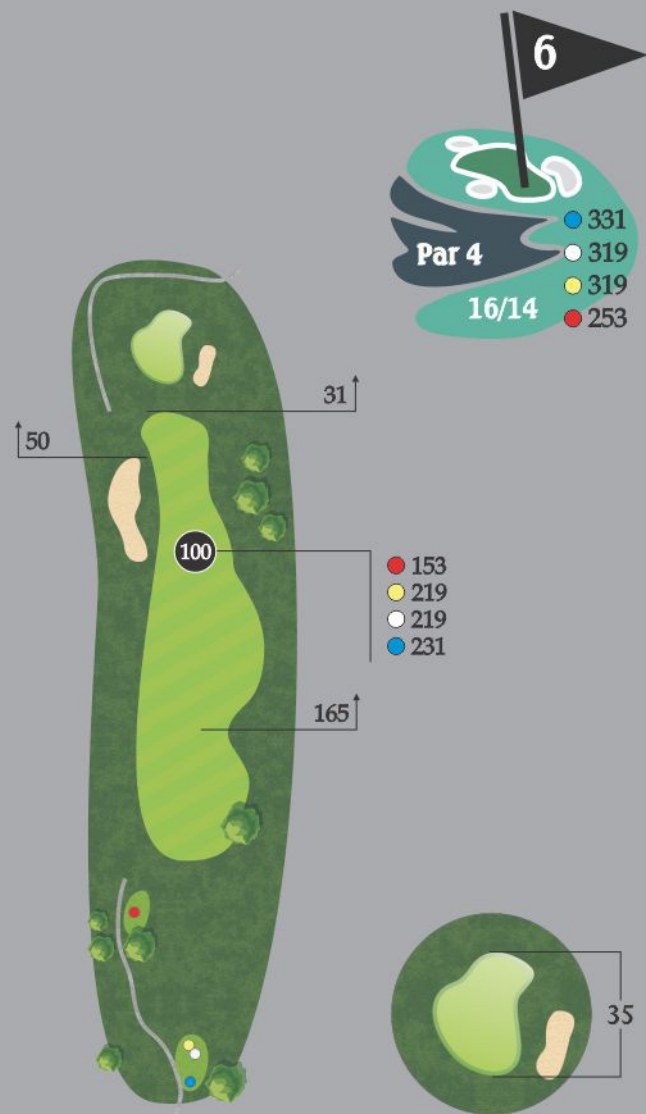

Easiest par three on the course. The elevated tee will allow you to sometimes hit a little less club, but be sure to check the wind.

HOLE SIX

One of the easiest par fours on the course. A fairway wood or iron is a good choice off the tee. A drive from center to right side of the fairway gives you a great second shot.

HOLE SEVEN

Seven is a long par five and you need a big drive if you want to go for the green in two. A small creek at about 150 yards to the green comes into play on your second shot. It is the largest green on the course, hit near the pin to avoid the three putt.

HOLE EIGHT

A great birdie opportunity on this par four. There is a lot of room for your tee shot, let the shaft out. A drive down the left side will give you a better second shot.

HOLE NINE

This short par four will entice a lot of big hitters to try and drive the green. Just be careful because there is a lot of trouble down the left side and out of bounds. A safe play is an iron in the fairway, which will give you a short iron into the well bunkered green. The green is very narrow with bunkers on both sides and slopes back to front.

HOLE TEN

A good drive is very important on this par four. The left side of the fairway is best to set up a good second shot. This hole has one of the toughest approach shots on the course. The green is very, very narrow and has the Grand River on one side and a small pond on the other. A par here is a good score.

HOLE ELEVEN

A 580 to 600 yard par five with trees on one side and the Grand River on the other side. It is a three shot hole so make your club selections with that in mind. Good luck on this hole. It requires you to hit it long and straight if you want to post a good score.

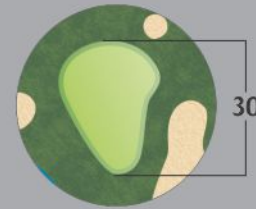

HOLE TWELVE

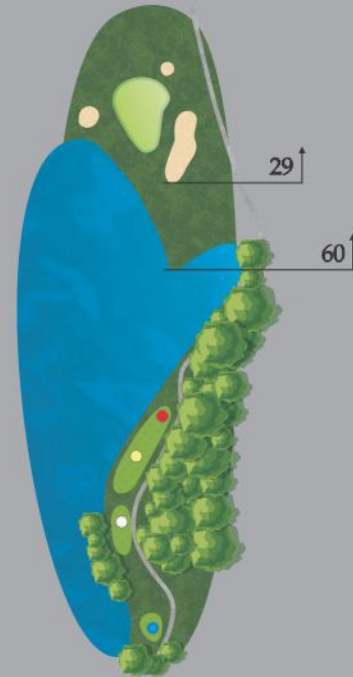

A short par four that requires a very accurate drive over a small creek with a large lake on the left side. After a good drive you will be left with a short iron to a slightly elevated green. Pull off the good drive and you definitely are looking at par or better.

HOLE THIRTEEN

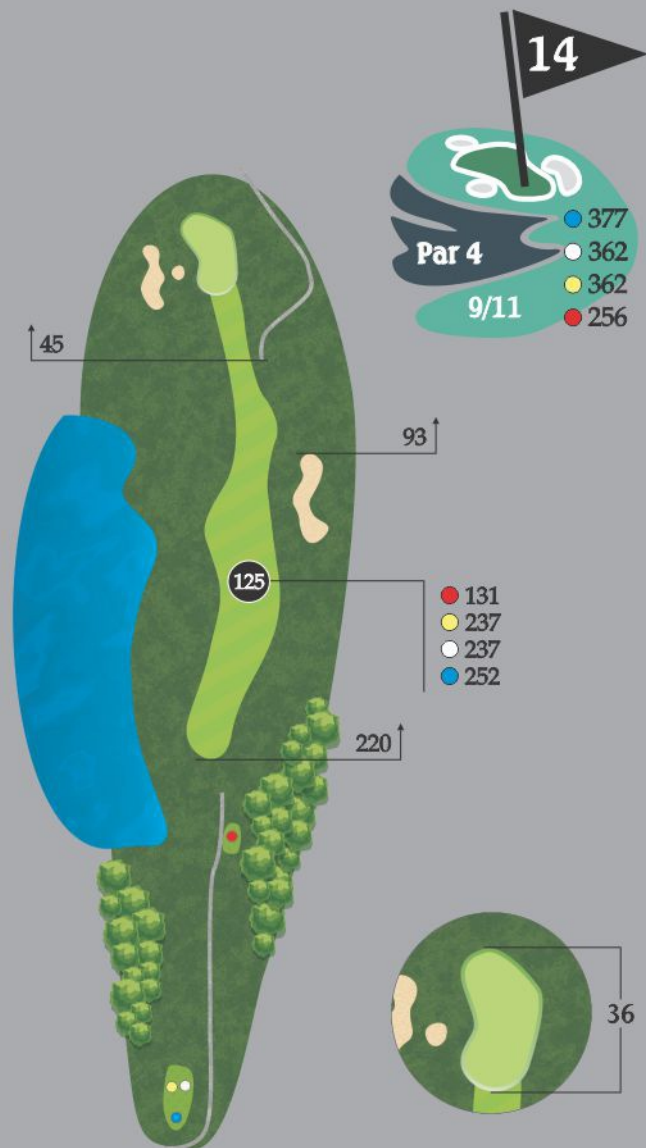

A fun and challenging par three. You want to play your tee shot over the corner of the lake. The biggest mistake people make here is not hitting enough club. Hit one club more than you think you need and get a par or better.

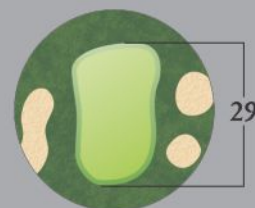

HOLE FOURTEEN

The easiest par four on the back nine. A lot of room for your drive so let the shaft out. A slightly two tiered green can cause some problems with putting. A good second shot usually means a par or better.

HOLE FIFTEEN

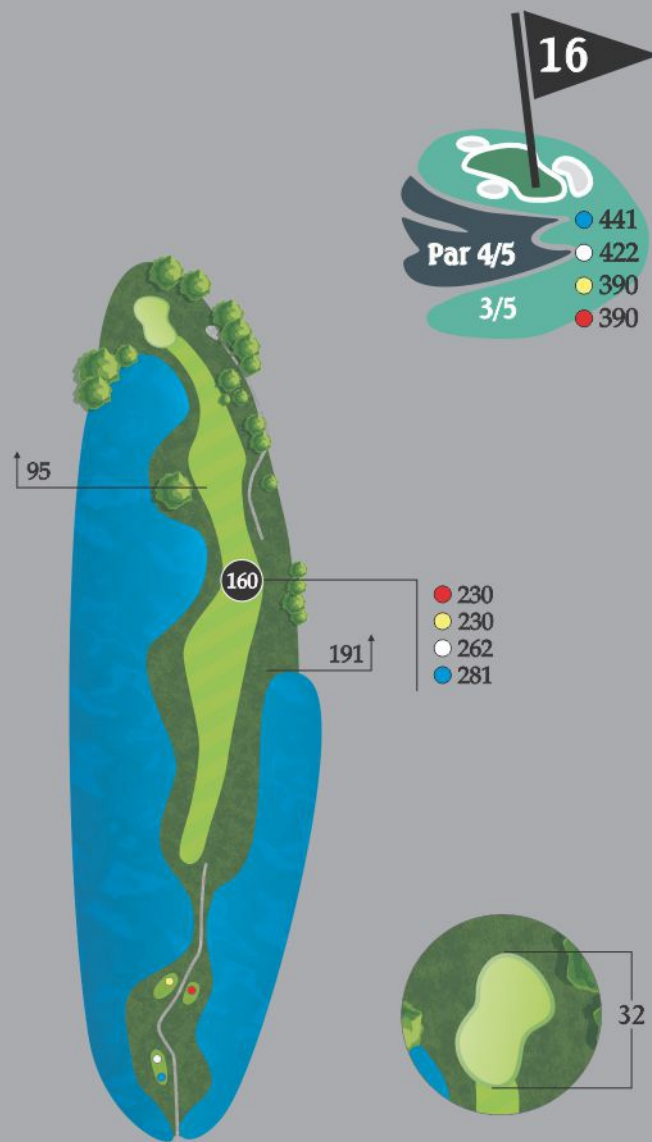

An inland green, do we need to say more... hit the green or end up in a bunker or the water. The yardage plays very true if it is 160 yards from the tees, hit your 160 club.

HOLE SIXTEEN

The toughest par four on the course. It requires a good drive and a long approach shot into the green. To make things even harder the fairway has water down both sides, a ball down the right side of the fairway gives you the best second shot.

HOLE SEVENTEEN

The shortest par four on the course, but it presents a lot of trouble. A creek runs down the right side of the hole that then runs across the fairway at about 100 yards. Hit your 200 yard club and you should have a short iron into the green. The green slopes severely from back to front, it is better to be short on the second shot than long.

HOLE EIGHTEEN

The last hole of the day is a par five. A good drive will give you an opportunity to go for the green in two. If you lay up you need to be aware of the creek running across the fairway at about 100 yards.
